Nevada City, CA 95959 | 530-478-5882

November 4, 2011

Dear Valued Customers –

This is to notify you that McCrometer Inc. has acquired substantially all of the assets of Automata, Inc. The Automata associates and location will remain in Nevada City, CA. I will continue to be involved with the business, leading R&D and Key Account Management. There are no immediate changes that will impact the products and service you have become used to. Our contact information has not changed and is listed below. Future Automata product purchases will be invoiced by McCrometer and payments will be processed thru their headquarters in Hemet, CA.

As you may know, McCrometer is a leader in flow metering instrumentation. For over 55 years, they have specialized in the design, manufacture, installation and testing of flow metering solutions. Their products serve a wide variety of customers, in key applications such as Agriculture, Municipal, Oil & Gas and Industrial. More recently McCrometer has expanded their product portfolio to include systems, sensors and software for Agricultural and Rural Water Management. Automata Inc. will be included in a new business within McCrometer, called McCrometer CONNECT, which will be focused on providing complete solutions for these applications.

We look forward to this next stage of our business and are excited to provide you with an expanded range of products to meet your needs.
