

## **RoHS Compliance Statement**

RoHS Directive-

The Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive was established by the European Union (E.U.). It affects manufacturers, sellers, distributors and recyclers of electrical and electronic equipment containing lead, cadmium, mercury, hexavalent chrome, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE). After July 1, 2006 the use of these materials will be banned in new products sold in Europe; however each E.U. member country will apply its own laws in regards to the directive.

Starting January 1,2008, Automata is in compliance with the RoHS directives on most of our products.

As a first step a certificate of compliance(COC) is on file for all approved components. Automata continues to develop tests and other cross checking procedures to validate the COCs from vendors. Automata, Inc. continues the process of converting all its products to be built RoHS compliant .

Automata, Inc. has actively sought out and developed alternatives that enabled customers, distributors and ourselves to reduce waste associated with the electronic industry.

**CTIK APPROVAL AND CE Certification** - Several MINI-SAT <sup>TM</sup> models have CE certification.
